Sabert makes food-to-go look great at Packaging Innovations

“Our mission is to offer our clients the best guarantees in terms of quality, safety and service, so you could say Sabert is the ‘go to’ for all your sustainable 2Go foodservice packaging solutions.”

“Visitors to stand D82 at the annual Packaging Innovations show at NEC, Birmingham, on 21 and 22 February, will be able to see Sabert’s soon to be launched Hot2Go and Tray2Go ranges, alongside our established Snap2Go, and Deli2Go ranges,” says Sabert UK&I Managing Director Alex Noake.

“For each of these food-to-go, takeaway and delivery packaging innovations, our focus is on making food look great, but as usual, we are also putting the emphasis on offering best value, coupled with best functionality, and best-in-class sustainability credentials.

“Sabert is celebrating 40 years of providing innovative, value-added products to the highest quality standards, supported by outstanding customer service. Our mission is to offer our clients the best guarantees in terms of quality, safety and service, so you could say Sabert is the ‘go to’ for all your sustainable 2Go foodservice packaging solutions.”

Hot2Go

New for 2024, and previewing at Packaging Innovations, Sabert’s Hot2Go range is made using a strong, durable multi-layer micro-fluted board that promotes heated food packaging integrity and is free from internal plastic lamination. Leak and grease resistant, the range is fully recyclable and customisable for bespoke print and sizing. Windowed options offer great visibility thanks to its clear rPET film. Stackable and nestable, the base is made from Forest Stewardship Council (FSC®) certified recyclable kraft paperboard, while the recyclable rPET window film has a guaranteed minimum 30% recycled content.

Tray2Go

Launched for bespoke opportunities at the end of 2023, with an off-the-shelf range available from April 2024, Sabert's Tray2Go is a fully recyclable multifunctional packaging solution which makes sushi, other chilled food-to-go, confectionery and bakery products look great.

The versatile Tray2Go range features a robust and durable double-wall tray design, coupled with an innovative secure fitting click-lock lid. The range is made using sustainable materials and is fully recyclable. The board bases, manufactured in the UK, are made with FSC® certified material, while the lids are made from rPET, at our facility in Belgium, and comprise a minimum of 50% recycled material.

Snap2Go

Sabert's established Snap2Go range brings an aesthetically pleasing, minimalistic design but with maximum functionality. This exceptional innovation offers good visibility thanks to the clear rPET lid which offers an easy one-hand closure and strong fit. Moisture and grease resistant, Snap2Go is an excellent choice for chilled meals and food-to-go applications.

100% made in Europe, Snap2Go is a fully recyclable solution. The base is made from FSC® certified paper and the rPET lid contains a guaranteed minimum 50% recycled content. Stackable and nestable, Snap2Go is available in four popular sizes – 375ml, 500ml, 750ml and 1000ml – with two high visibility rPET clip-lid sizes. Sabert also offers bespoke designs and sizes with fully customizable print available, so brand owners can easily add their logos and messages.

Deli2Go

Sabert's Deli2Go board tray range is ideal for hot and cold foods. Made in Europe, the stackable and nestable Deli2Go board trays are grease resistant and refrigerator friendly. Available in four popular sizes, they can be paired with one common innovative PP lid with an external clip that provides one-hand closure – creating a secure fit for food-to-go applications, while also providing great food visibility for maximum appeal. Both the tray and the lid are fully recyclable.

Meet your 'go to' 2Go packaging solutions provider

"Visit stand D82 at the annual Packaging Innovations show at NEC, Birmingham, on 21 and 22 February, to meet the Sabert team and discuss all your food-to-go packaging needs," says Sabert UK&I Managing Director Alex Noake. "As a consultative business, we can ensure that operators are using the perfect packaging solutions to best fit their business, while helping them to improve their sustainability credentials."
