

Truvox International partners with i-Team Professional to bring imop Lite and i-scrub 21B to the UK

26 February 2024: Hedge End, Southampton-based Truvox International has signed an agreement with Eindhoven, The Netherlands-based i-Team Professional to bring two of its products to the UK cleaning and FM market under the Truvox brand.

Joining the existing Truvox line-up are imop Lite and the i-scrub 21B cordless power scrubber.

“i-Team Professional BV has entered into an OEM partnership with Truvox International, a subsidiary of Tacony Corporation, headquartered in Southampton, UK,” says i-Team Professional Regional Ambassador UK, Ireland & Benelux Thijs Stolwijk. “A key industry challenge is a shortage of labour, and by adding these two products into the Truvox portfolio, operators can change from manual to mechanical floor cleaning, which results in increased productivity and savings in chemical costs.”

“Entering into an OEM partnership with i-Team Professional represents an exciting business development at a time when Truvox International is already experiencing huge success and rapid growth,” says Truvox International Executive Director, Gordon McVean.

“The new imop Lite and i-scrub 21B are ideal for cleaning small and occupied spaces, and perfectly complement our existing floorcare ranges. From scrubber dryers such as the Multiwash™ PRO range to vacuum cleaners such as the VTve and Valet Dual Motor, our machines are renowned and respected for being easy to use, efficient and reliable.

“We look forward to introducing these new floorcare solutions to existing and new customers and to demonstrating their effectiveness at our newly opened showroom at Hedge End.”

Start scrubbing everywhere and anywhere

“Truvox International is excited to expand its successful and popular floorcare ranges with the introduction of two new products from i-Team,” concludes Gordon McVean. “These versatile machines will literally enable cleaning operatives to start scrubbing everywhere and anywhere.”

Easy to operate, the imop Lite offers the manoeuvrability of a mop with the power of a scrubber, delivering fast, efficient, mechanized cleaning in areas that up until now could only be done by hand. Its lightweight and smaller profile allows it to be quickly deployed to isolated areas and lets operators work on multiple levels, even in the tightest spaces.

The unique design of the imop Lite puts more weight into the brushes and combined with its powerful battery-driven motor, results in more cleaning power than any auto-scrubber in its class.

Meanwhile, the i-scrub 21B is a versatile cordless power scrubber which features double-disc action, while the adjustable head can rotate in 360° and is so flexible that it can clean at any angle – horizontal or vertical. The i-scrub 21B is equipped with two brush heads, for higher mechanical power and for cleaning narrow gaps in sturdy areas. The in-height adjustable telescopic wand is easily controlled at the grip, as all operator actions, switches and controls are centralised and within fingertip reach.

About Truvox International

Truvox International is a leading global manufacturer and supplier of commercial and industrial floorcare machines, based in Southampton, England.

From the production of its first electrical polishing machines in the early 1960s, Truvox has successfully expanded both its product range and its geographic reach to a point where it is now recognised in over 70 countries worldwide.

Truvox International has a wide range of well-established brands including Orbis rotary burnishers, Hydromist carpet extractors, Valet vacuums, Multiwash scrubbers and Cimex three brush technology.

In 2007, Truvox International became part of the Tacony Corporation, based in St Louis, Missouri, USA. Tacony Corporation has three core divisions: Commercial Floorcare; Home Floorcare; and Sewing.

About i-Team Professional

i-Team Professional develops, manufactures and sells cleaning solutions for professionals. I-Team is mostly known for their revolutionary scrubber dryer: the i-mop. The i-mop original is celebrating its 10th anniversary this year and is still groundbreaking. It works so fast and easy, companies that buy an (average) i-mop have a ROI of 9 months.

Compared to conventional cleaning, it allows you to clean 75% faster, is way more sustainable (80% less water, 50% less energy and 80% less cleaning detergents) and better for the cleaners because of its user-centric design (75% less strain). The i-mop is better for the cleaner and the planet.

Over the past 10 years, the company has developed several i-mop versions so there is now a scrubber dryer for every cleaning challenge. Co-botics, cleanroom i-mops, vacuum cleaners, gum removers, glass cleaning solutions and microfibers are all part of the product portfolio.

The i-Team headquarters and its unique experience center is located in Eindhoven, The Netherlands. The >7,000m² experience center also serves as a living lab with its own plane, train, buses, supermarkets, cinema, kindergarten and professional broadcast studio. It has become a cleaning hub, a gathering place for cleaners and the cleaning industry, with more than 10,000 visitors per year.

i-Team Professional is a fast-growing company with a CAGR >30% since 2014. They have a global force of more than 250 partners, with whom they distribute their products in over 70 countries worldwide.
