

Sabert introduces new version of its popular and practical Deli2Go range

Sabert Corporation Europe has launched a new version of its compact Deli2Go range. Perfect for chilled foods and side dishes, Deli2Go delivers improved performance. The patented base uses the same lid-clipping technology as Sabert's award winning Tray2Go range, delivering secure closure with the new rPET lid, which offers more transparency for enhanced food visibility and optimum presentation.

"This improved version of Deli2Go delivers on our commitment to continuous improvement, combining practical design with a new base that enables a secure clipping lid system that helped our Tray2Go range earn a prestigious National Gold Award in the Paper & Packaging Innovation category at the Green Apple Awards for Environmental Best Practice," says Alex Noake, Senior Vice President & Managing Director for Sabert Europe.

Perfect for chilled food counter service and catering

Freezer-safe Deli2Go is a perfect solution for preparation and chilled food counter service, making chilled meals and side dishes look great. In quick service and snacking, Deli2Go is ideal for take-away meals, salads, pasta dishes and more, while in catering and foodservice, the range is suitable for preparing and transporting individual meals.

For corporate and institutional catering, Deli2Go is the practical and high-quality solution for serving cold dishes and prepared meals that are easy to distribute, and

for the retail grab & go sector it is ideal for in-store food corners, supermarkets, and petrol stations.

Aesthetic and minimal design with maximum functionality

The stackable and nestable bases are grease resistant and made from FSC™ certified recyclable kraft paper. Available in three sizes (125ml, 250ml, and 375ml), they are also fully printable, offering customers versatile usage options and opportunities for bespoke branding.

The patented base delivers a secure closure with the crystal-clear rPET lid which offers excellent product visibility for food-to-go applications.

Made in Europe

Made in Europe, both the tray and the lid are fully recyclable. The board bases are made in Sabert's facility in Kimbolton in the UK, while the unique lid, compatible with all three tray sizes, is manufactured at Sabert's facility in Nivelles, Belgium.

The new Deli2Go joins the award-winning Snap2Go and Tray2Go, further expanding Sabert's range of innovative and sustainable foodservice packaging solutions.

"We have over 40 years' experience in providing innovative, value-added products to the highest quality standards, supported by outstanding customer service," concludes Alex Noake. "Our mission is to offer our clients the best guarantees in terms of quality, safety and service, so you could say Sabert is the 'go to' for all a foodservice operator's sustainable 2Go foodservice packaging solutions."

About Sabert

Sabert is specialised in manufacturing and marketing food packaging, disposable high-quality tableware and compostable food packaging and tableware. Through various partnerships established with some of its customers, Sabert Corporation Europe commits to develop its products and its production's processes in a sustainable way. With 40 years of experience, Sabert provides innovative, value-added products to the highest quality standards supported by outstanding customer service. We have given ourselves the mission to offer our clients the best guarantees in terms of quality, safety and service. Today, our product solutions fulfill this vision and have earned the trust and loyalty of customers around the globe. As our employees and clients agree, Sabert makes food look great!

In July 2025, Sabert acquired Colpac Limited, a leading UK-based manufacturer of sustainable paperboard packaging solutions for the food-to-go foodservice and industrial markets.
