

Fenton Packaging Solutions achieves EcoVadis Gold rating

Leeds-based **Fenton Packaging Solutions** has been awarded a Gold medal for sustainability by **EcoVadis**, only one year after achieving a Bronze rating.

“We are thrilled to announce that Fenton Packaging Solutions has achieved the prestigious Gold medal accreditation from EcoVadis, the world’s most trusted provider of business sustainability ratings,” says Fenton Managing Partner Chris Warren.

“This award puts Fenton Packaging Solutions in the top 5% of companies assessed by EcoVadis in the past 12 months, and sets a benchmark for our continued commitment to providing measurably sustainable packaging solutions for our ever-expanding range of clients across a wide variety of industries.

“Only one year ago we were awarded a Bronze rating so this is further proof that sustainability is at the heart of our business. This recognition highlights our continued commitment to embedding sustainability principles into every aspect of our operations.

“This independent assessment provides the verified data we need to benchmark our performance, celebrate key achievements, and strategically plan our next steps towards making greater impact.”

The award confirms that Fenton Packaging Solutions has demonstrated an advanced sustainability management system that covers the four themes: Environment; Labour and Human Rights; Ethics; and Sustainable Procurement.

To mark the achievement, EcoVadis has planted a tree as part of the One Tree Planted scheme which supports forest fire recovery and healthy ecosystem restoration.

Innovative sustainable packaging solutions

“At Fenton Packaging Solutions, our highly experienced expert team, coupled with the most established and reliable suppliers, are proud to share our passion for innovative sustainable packaging solutions. We deliver a consultative approach and, through innovation, we actively steer our customers towards using the most sustainable packaging options for their businesses. At the same time, we stay one step ahead by constantly seeking out – and working with our suppliers to develop – new and innovative ethically-sourced sustainable packaging solutions.”

Fenton Packaging Solutions delivers a wide range of sustainable packaging solutions which are: recyclable; lightweight; and made from ethically-sourced sustainable materials.

Fenton’s metal packaging can be infinitely recycled and much of its lightweight plastic packaging contains high percentages of post-consumer recyclate, while the company’s flexible and recyclable bag-in-box solutions are a viable replacement for 20 litre rigid plastic jerrycans.

“The EcoVadis process has enabled us to look more closely at how we operate as a business and we’ve made significant sustainability improvements, from moving to a more modern fuel-efficient fleet to replacing company cars with fully electric models,” says Fenton Packaging Solutions Project Manager Alison Gales.

“We recently published our 2026 Sustainability Report which details Fenton’s ongoing commitment to responsible business practices, continuous improvement and investment in initiatives that support long-term environmental, social and governance (ESG) objectives. The publication reflects the company’s ambition to build on recent sustainability achievements while continuing to deliver innovative packaging solutions that meet the evolving needs of customers and the wider marketplace. Notes for editors:

About Fenton Packaging Solutions

Fenton Packaging Solutions specialises in stocking and distributing a wide range of metal, plastic, flexible and corrugated packaging suitable for a variety of industry sectors including food, dairy, beverage, pharmaceuticals, chemicals, detergents, paints, inks, resins and adhesives.

As a company we are both active and engaged as members of a number of leading UK industry associations: British Coatings Federation (BCF); British Contract Manufacturers & Packers Association (BCMPA); Foodservice Packaging Association (FPA); and Ice Cream Alliance (ICA).

Established in 1945, originally as a metal packaging manufacturer, we have over time transitioned into the business that we are today. In 2022, the company rebranded, changed our logo and moved to our current home at Kinetic 45 in Leeds.

About EcoVadis

EcoVadis is a globally recognised sustainability assessment platform, evaluating over 100,000 companies worldwide across four key themes: Environment; Labour & Human Rights; Ethics; and Sustainable Procurement.

EcoVadis' rigorous assessment methodology is built on international sustainability standards such as the Global Reporting Initiative (GRI), the United Nations Global Compact, and ISO 26000. Companies are evaluated annually, and the scoring methodology is continuously refined, making medals increasingly difficult to achieve.

Please note:

Suzanne Howe Communications (SHC) has supported the Copyright Licensing Association (CLA) and the National Licencing Association (NLA) for many years. We are aware of the great work they do in the world of journalism and publishing. We see our licences as a way of giving back and therefore they form part of our Sustainable and ESG commitment as a business. We would like to take this opportunity to thank you for the coverage you might give our client. We might wish to use the coverage on our social channels to promote our clients but also to thank you. If you would prefer that we didn't share your coverage online, please make this known to SHC. Thank you very much.
